

This College Africa Group course will enhance the user's skills on the subject and teaches fundamentals as well as strategies in an easy to follow, easy to understand format and includes practical exercises which will assist in developing your skills in the workplace.

COURSE OUTLINE - Financial Analysis (Revised Edition)

Course Number: AXO84–072ig | **Days:** 1 day

Description: This training program is designed to help you acquaint others with the basics of financial analysis. In this course, participants will become familiar with the contents of corporate financial statements and with special statements such as inventory, depreciation, and retained earnings. This course also addresses ratios concerning capitalization by common stock and the ways in which the ratios interact when one is changed. By completing this course, participants will learn how to make quick decisions based on financial analysis.
